"Engineering is the practice of learning."

SUMMARY

Engineering Professional passionate about deriving insights and advancing knowledge from data, automating workflows and software deployment to enhance efficiency, reduce costs, and elevate code quality. Eager to develop further in data analytics, applying various machine learning models, and data visualization, while cultivating leadership and strategic planning skills within collaborative team environments.

With over a decade in the semiconductor industry and years in diverse roles like software development, academic research, and data science, I bring a robust background complemented by a Master's degree in Software Engineering and Management from Graz University of Technology. My career includes contributions in academia and industry, emphasizing initiative, meticulous documentation, and the clear communication of complex ideas.

Committed to agile development and effective teamwork.

EDUCATION

GRAZ UNIVERSITY OF TECHNOLOGY

📍 Graz, Austria

Diplom-Ingenieur (M.Sc.) in Software Engineering & Management

📅 April 2018 - June 2022

- Grade: Graduated with distinction
- Major: Intelligent Systems | Minor: Management & Strategy
- Thesis: Embedded Image-based Localization For Assessment Of Critical Infrastructure

Bachelor of Science in Software Engineering & Management

📅 Oct 2014 - April 2018

- Thesis: Modeling And Evaluating CPU Caches In Software (QEMU)

COURSEWORK

M.Sc. degree program: Knowledge Discovery & Data Mining • Machine Learning • Deep Learning
Web Technology (HTML5) • Expert Systems • Verification & Testing
Security Aspects in Software Development
General Management & Organization • Change Management
The Art of Feedback • Intercultural Social Competence

B.Sc. degree program: Data Structures & Algorithms • Statistics & Probability
Linear Algebra & Analysis • Software Maintenance • IT Security & Networking
Operating Systems • Computer Vision & Graphics • Computational Intelligence

SKILLS

Operating Systems: 🍏 macOS x86-64/ARM64
🐧 GNU/Linux x86-32/64/ARM64

Linux Distributions: Debian • Arch • RHEL

Paradigms & Practices: Agile (DevOps, XP, Scrum) • Git-flow • OOP • RESTful

Languages: C • C++ • Bash • Python • Java • Kotlin • JavaScript • AsciiDoc • \LaTeX

Databases: SQL • Couchbase NoSQL

Libraries & Frameworks: Pandas • NumPy • SciPy • Scikit-learn • Matplotlib • Searborn • Plotly
TensorFlow (Keras) • PyTorch • OpenCV • ROS

Tools: Docker • VirtualBox • KVM/QEMU • Vagrant • Conda • Pyenv(-virtualenv) • Poetry
Git • Jira • Gitlab CI/CD • Vim • Tmux • POSIX commands and terminal utilities

Communication: English (C1/2-level) • German (native)

SKYSPECS

📍 Graz, Austria & Ann Arbor, MI

Data Scientist

📅 July 2023 - present

- Develop and extend algorithms to address key challenges in the wind industry, such as loss of energy assessment, pitch misalignment, performance analysis and more, focusing on broad applicability and efficiency for large wind farm portfolios.
- Work primarily in Python to conduct data manipulation, analysis, visualization, and interpretation of large-scale time-series data in combination with other data sources such as meteorological data, error, or maintenance logs.
- Use statistical and machine learning methods to analyze, classify, cluster and interpret SCADA (Supervisory Control and Data Acquisition) data of individual wind turbines, in order to identify and predict anomalies and performance issues.
- Lead the transition of final prototypes to production, including big-scale testing and integration into the existing software infrastructure, for monthly execution across more than 4000 client wind turbines.

JOANNEUM RESEARCH

📍 Graz, Austria

Research Assistant

📅 Oct 2020 - June 2022

- Engineer computer vision applications to enhance real-time object detection and pose estimation capabilities of a drone, using only imagery from its calibrated camera.
- Construct a robust data acquisition pipeline from a highly accurate infrared-based tracking system, utilizing the Robot Operating System (ROS), to generate a suitable dataset for algorithm development and testing.
- Configure containerized solutions for NVIDIA Jetson embedded computing devices.
- Prepare and deliver detailed interim reports and presentations for the FFG (Austrian research funding agency), highlighting project progress, key findings, and strategic recommendations to ensure stakeholder alignment and continued project funding.

Publications:

- Automated Data Annotation for 6-DoF AI-Based Navigation Algorithm Development. *Journal of Imaging* **2021**, 7, 236.
- Protocol Design Issues for Object Density Estimation and Counting in Remote Sensing. *IGARSS* **2021**, pp. 2771-2774.

BYTEPOETS

📍 Graz, Austria

Junior Developer

📅 Aug 2018 – April 2019

- Build and maintain responsive websites and user interfaces using HTML and modern frameworks like Spring and Bootstrap, ensuring scalability, cross-platform compatibility and optimal user experience.
- Design and develop mobile applications for iOS and Android platforms, focusing on seamless integration and robust functionality.
- Implement RESTful web services interfacing with various databases such as Couchbase NoSQL and SQL, ensuring efficient data retrieval and storage.
- Facilitate continuous integration and continuous delivery (CI/CD) processes using Jenkins, enhancing development workflows and deployment efficiency.
- Employ Agile project management methodologies to streamline project execution and enhance team collaboration and productivity.

IAIK

📍 Graz, Austria

Institute of Applied Information Processing and Communications | Intern

📅 Aug 2017 – Nov 2017

- Develop and optimize a custom Linux distribution tailored for specific applications using the Yocto Project.
- Implement encryption protocols to secure large parts of the system memory in a QEMU emulation environment, aiming to enhance data protection and security.
- Deploy custom Linux distribution images to ARM-based Xilinx Zynq7 Systems on Chip (SoC) and test system operation.

LAM RESEARCH

📍 Villach, Austria & Fremont, CA

Electrical Engineer

📅 Sept 2012 – Sept 2014

- Participate in the electrical assembly and prototyping of novel Lam-platform designs in Fremont, California.
- Support engineering activities such as design, test, modification, fabrication, and assembly of prototype electromechanical systems and experimental design circuitry.
- Conduct structured diagnostics and troubleshoot a broad range of hardware, software, and networking issues, ensuring system integrity and performance.

SEZ & LAM RESEARCH

📍 Villach, Austria

Electrical/Test Engineer

📅 Sep 2006 – Sept 2012

- Perform, evaluate and supervise electrical assembly of SEZ and Lam Research etch platforms as well as special customer requests.
- Contribute improvements to the configuration and documentation of mechanical drawings, wiring diagrams and internal test records.

SEZ

📍 Villach, Austria

Apprenticeship Mechatronics Engineer

📅 Sep 2002 – Mar 2006

- Successful completion of the mechatronics technician apprenticeship.
- Acquire basic electrical, mechanical, and computer science skills.
